

August 22, 2016

Ashe County Schools is currently using an information management system known as PowerSchool. The parent module in PowerSchool gives access to grades, attendance and demographics. It provides real-time student progress reporting (seven days a week, 24 hours a day!), increased parent involvement and language choices (English, Spanish). If you have not picked up your log-in information at your school, please contact the data manager for this information.

To ensure the accuracy of information, please verify the attached demographic form—**make changes as necessary, sign and return to your school by Friday, September 2. In addition, we request that you fill out the information requested below as well.**

Thank you for your time, assistance and patience in making sure that we have the most current information.

Student Name _____

Custody of Student—*relationship to student* _____

Name _____
